# PLANNING IMMERSIVE SPACES

Maximise your investment and avoid disappointment on your next project.

**SOUND EXPERIENCE.** With over 40 years experience of critically acclaimed audio performance, NAD offers the difference between functional audio (as heard in a shopping mall) and emotionally engaging high-resolution sound in and around your new space.

**TALK TO US.** After decades of specialised A/V custom installation, we still hear comments from those who are disappointed that they did not plan for their entertainment needs. Tell us about your plans, even if the budget doesn't stretch right now, we have options to install speaker placeholder hardware and specialised cabling for future use. We can guide you with pre-wiring and other vitally important things you didn't know to ask.

**IDEAS.** Please read on for inspiration and ideas on what's available to transform your building project into an entertaining and immersive space.

# ZONE AMPS

---

Small in size, but surprisingly powerful, these zone amplifiers allow for several placement options. Locate them where needed or hidden in cabinetry, they use modern amplification technology to offer enough power to breathe life into your space.

Whether your source is a high resolution streaming or hand held device, Smart TV or a more traditional component, like a turntable, these zone amplifiers are ideal to power in-ceiling, in-wall or even satellite speakers combined with a subwoofer. They offer a richer sound experience of your favourite music, movie or TV series binge.

## Pre-wire now for the future

If budget or other constraints mean you aren't ready to install speakers just yet, we can help with 'place-keeping' hardware at a fraction of the price. This will prepare your space during the pre-wire process until the time is right.

## BluOS™

BluOS™ is a complete premium multi-room audio ecosystem that manages multiple music sources and playback. Adopted by some of the most renowned hi-fi audio brands and integrated with numerous smart home control systems, BluOS offers distributed audio solutions for every lifestyle, from Hi-Fi enthusiasts to the Digital music lover.

CUSTOM INSTALL

## D3020 V2

Don't let the small form factor fool you! NAD's popular D3020 is powerful enough to sound great with in-ceiling, in-wall or even a subwoofer / satellite system.

- 2 x 30w HybridDigital™ amplification
- aptX Bluetooth music streaming
- MM Phono input for turntables
- Optical and coax digital inputs, analogue inputs
- Subwoofer output | Preamp output (full range)
- Headphone output
- Wireless remote

## D3045

A big brother to the D3020, with Apple Airplay, ARC for Smart TV audio and a substantial upgrade in power for the most demanding of spaces.

- 2 x 60W HybridDigital™ amplification
- Two-Way Bluetooth, powered by Qualcomm aptX HD audio
- HDMI audio return channel
- Coax and optical input
- MM phono and line input
- Subwoofer output | Preamp output (full range)
- Separate internal headphone amplifier
- Wireless remote

## CI 720 V2

Either hidden in cabinetry or grouped with multiple units at a central location, the powerful, CI 720 streaming amplifier can be expanded to up to 64 zones. Just add speakers and enjoy!

- 2 x 50W HybridDigital™ amplifier
- BluOS enabled offering high-resolution streaming
- Apple AirPlay2
- Rack mount option or key hole mounting
- Subwoofer out
- Analogue audio, digital optical and USB inputs
- Thermostatic fan cooling
- Reliable hardwired network connection

### TIP

Even the simplest of systems can be made more discrete and offer improved performance with a little planning. Placing cabling 'behind the scenes' for in-wall or in-ceiling speakers during the building process is both cost-effective and elegant.

# MULTI-ZONE AMPS

Instead of multiple amplifiers being placed around your space, one powerful custom-install designed multi-zone amp system does it all!

Whether you're simply wanting music in multiple areas or a concert performance in every space, it is all possible with the right system design and amplification.

NAD's multi-zone amplifiers are available from 4 to 16-channels and come with NAD's legendary amplifier performance.

## Pre-wire now for the future

If budget or other constraints mean you aren't ready to install speakers just yet, we can help with 'place-keeping' hardware at a fraction of the price. This will prepare your space during the pre-wire process until the time is right.

## BluOS™

BluOS™ is a complete premium multi-room audio ecosystem that manages multiple music sources and playback. Adopted by some of the most renowned hi-fi audio brands and integrated with numerous smart home control systems, BluOS offers distributed audio solutions for every lifestyle, from Hi-Fi enthusiasts to the Digital music lover.

CUSTOM INSTALL

## 8-CHANNELS

## 16-CHANNELS

### CI-580 V2

Unleashing the power of BluOS across 4-zones, this is the latest version of NAD's award-winning multi-zone streamer.

- 4 Stereo zone BluOS enabled source component
- Works with Apple AirPlay2 (multiple-zones)
- Single digital and analogue audio input
- Doorbell override
- Fixed or variable line output
- System interrupt
- 1U rack chassis
- 1 ethernet connection for all zones
- USB input
- Uses standard network protocols
- Ideally partnered with NAD's multi-channel power amplifiers options, starting with the CI 980

### CI-980

A 4 zone (8 channel) amplifier matching the CI 580 V2 streamer.

- 8 x 50W @ 8 ohms all channels driven
- 8 x 60W @ 4 ohms all channels driven
- <0.05% x THD/IM distortion
- Bridgeable to 100W
- Global input allows each zone the option of using the local dedicated input or being combined with other zones
- Three power modes: trigger, auto sense, front panel switch
- Independent level controls for each channel
- Thermostatic forced air cooling
- Designed to drive low impedance speakers and long wire runs
- 2U rack space | rack mount ears included

### CI 16-60 DSP

For those with many spaces requiring high quality sound. We have you covered with this 8 zone (16 channel) single component amplifier.

- 16 x 60 Watts @ 8/4 ohms all channels driven
- Custom web application manages DSP calibration, IP control and more
- Exceptionally low distortion
- Three power modes: trigger (5V – 30V, AC or DC), auto sense, front panel switch
- Independent level controls for each channel
- Thermostatic forced air cooling
- Rack mounting, hardware included

*\*Final product specification to be confirmed*

## TIP

When considering multiple entertainment spaces, many are misguided by the best of intentions, suggesting that wireless products be used after the build is complete. This is not always correct and with simple planning before walls and ceiling go up, a well-designed cable infrastructure can greatly improve performance, reliability and network security.

# PREMIUM MULTI-ZONE NETWORK AMPS

Offering cutting-edge amplification technology, unapologetically designed for those spaces demanding the absolute best performance from distributed audio systems.

While hidden from view, the engineering is such that, regardless of the distance from the equipment to the speakers in the room, you'll extract every ounce of performance from the music or soundtrack source.

Regardless of the quality of the electronics, speakers or source, the space itself can sometimes be the weakest link. DSP technology allows each space in and around your home to be bespoke 'tuned' for optimal performance. DSP technology and the skill of a professional installer means you unlock the full potential of your audio system.

## Pre-wire now for the future

If budget or other constraints mean you aren't ready to install speakers just yet, we can help with 'place-keeping' hardware at a fraction of the price. This will prepare your space during the pre-wire process until the time is right.

## BluOS™

BluOS™ is a complete premium multi-room audio ecosystem that manages multiple music sources and playback. Adopted by some of the most renowned hi-fi audio brands and integrated with numerous smart home control systems, BluOS offers distributed audio solutions for every lifestyle, from Hi-Fi enthusiasts to the Digital music lover.

CUSTOM INSTALL

**8-CHANNELS | 120watts | DSP**

**8-CHANNELS | 150watts | DSP**

## CI 8-120 DSP

This new design is like having 4 high-performance NAD Amplifiers in one component. It is network controlled which allows the installer to configure and calibrate to extract every ounce of performance.

- 8 Channels x 120 Watts @ 8 ohm
- Bridgeable to 4 channels x 200 Watts @ 8 ohm
- Renowned NAD sonic performance and effectively handles long cable runs and difficult speaker loads
- Custom web app manages DSP calibration, IP control and more
- Dual global inputs/outputs
- 1U rack height
- 0.5W standby mode, 3W network standby
- 12V trigger in; IR in/out
- Auto Sense Turn-on

## CI 8-150 DSP

Class-leading amplification in a smaller form. This premium level multi-channel amplifier offers performance in class of its own.

- 8 Channels x 150 watts @ 8 ohms
- Bridgeable to 4 channels x 300 watts @ 8 ohms
- NAD's HybridDigital nCore amplifier delivers unmatched sonic performance
- Platform accessed through IP control
- Custom web application manages DSP calibration, IP control and more
- Effectively handles long cable runs and difficult speaker loads
- Dual global inputs/outputs
- 2 x optical and 2 x coax inputs
- Only 2U rack space height

**TIP**

When considering multiple entertainment spaces, even at the highest level of performance these multi-zone amplifiers can still benefit from some forethought and planning. With ideas of how you want to live in your new space and the skill of an installation professional their premium performance is assured.

NAD

# PREMIUM HOME CINEMA

Home Cinema amplifiers offering critically-acclaimed Music Streaming, Surround Sound performance and bespoke tuning of your audio-visual space.

MDC Modular Design Construction 4K ULTRA HD BluOS ENABLED Hi-Res AUDIO DIRAC

MDC Modular Design Construction 4K ULTRA HD BluOS ENABLED Hi-Res AUDIO DIRAC

## T758 V3i

Award-winning performance doesn't have to break the bank with the T758, now with BluOS and Apple Airplay 2.

- 7 x 60W (110W x 7 FTC) Continuous Power into 4 or 8 Ohms, all channels driven
- Exceptionally low distortion at only <0.05%THD (Full Power)
- 4K UHD + Dolby Atmos
- High-Res BluOS enabled
- Dirac Live advanced room calibration
- MDC (Modular Design Construction) for future upgrades

**TIP**

Considerations for your media space include commonly used seating positions, screen location and size and pre-planning for the specialised video, data and multiple speaker cables for the ultimate in immersive spaces.

## T778

With 9.2 channels and support for nearly every audio format known, this is the heart and soul of a high-performing A/V system.

- 9 x 85 Watts FDP (Full Disclosure Power), all channels driven or 165 Watts IHF Dynamic Power at 8 Ohms and 280 Watts at 4 Ohms
- 4K UHD + Dolby Atmos
- Hybrid digital amp technology
- TFT touch screen and improved ergonomics for user-friendly operation
- High-Res BluOS enabled network streaming
- Dirac live room correction
- MDC (Modular Design Construction) for future upgrades, including 8K video
- 3U Low profile rack-mountable chassis
