Is the new Sky TV box causing you Infra-red grief?

We've tested the new KAON supplied set-top Sky box with our **Naked Cable** wide-band 'IR KIT'. The system plays nicely and we have the following suggestions to help with flasher placement...
(#1) This position appears to offer good all-round performance. In some situations the flasher may be more suited to horizontal placement (above the KAON's IR sensor) (#2).
