

Installer Tip

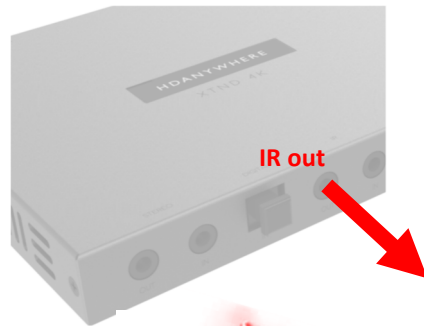

Expanding IR

IR Control to multiple components

CONNECTED MEDIA

HDANYWHERE

- IR control through an HDMI extender is normally limited to a single source component.
- There is a simple way using an active IR hub to expand the single output to multiple components.

NOTE: This is not suitable where discrete control of the same component is required. i.e. 2 x identical Sky boxes

*Applies to models other than XTND2K30

Ring and Sleeve to 'IR IN'

Tip to 'GND'

XTND2K30 Ring only to 'IR IN'

Naked Cable HUB-6 IR Kit shown
