

## OSUB Series

### Seasons Landscape Collection

Subwoofers for music and home theater are commonplace. In the Landscape Collection this same technology has been converted to withstand the harsh realities of an exterior environment. Encased in high-density composite materials the OSUB10P reproduces the deepest bass frequencies in unison with surrounding 8 ohm and 70 V speakers in the system.

OSUB10P

### Safeguarded from the Elements

The OSUB10P is shielded in a dense Poly Composite and UV resistant material to withstand the harshest of weather conditions, enabling it to play in rain, sleet, or snow without flaw. The OSUB10PBASE provides an additional stand to prevent any soft surface from tampering with the sound quality.

### Hardscape Installation

The OSUB10P is designed to provide bass in outdoor spaces that don't allow for in-ground installation. The enclosure mimics patio furniture with an unobtrusive UV protected camouflage brown finish that is subtle to the eyes.

### Uncompromised Punch

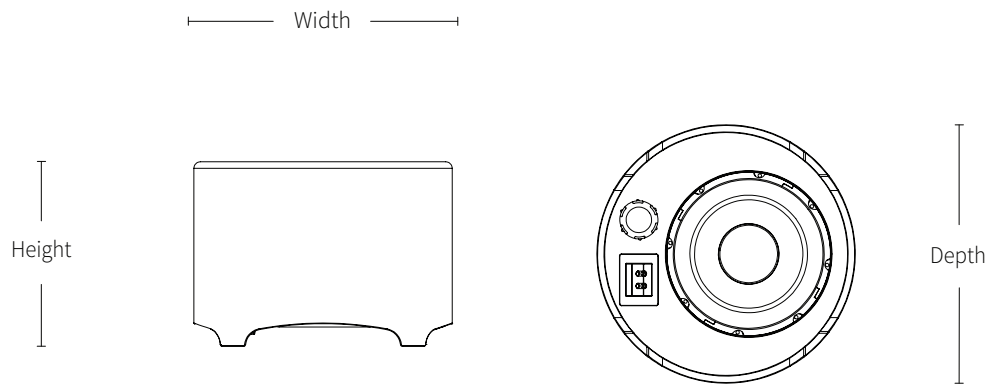

Firing from the ground up, the 10" down-firing woofer leverages solid surfaces beneath it to radiates deep frequencies in every direction. Capable of handling over \_\_\_\_\_ watts, the OSUB10P delivers an unmatched pulse of powerful bass for the outdoors.

### Fits Right In

Engineered with an 8 ohm and 70 V switch, the OSUB10P sits right in line with your system as a bass-full complement to existing surface mount and landscape speakers. Mix and match with Origin Acoustics Seasons Collection satellites or outdoor surface mounting speakers to form the perfect audio oasis.

# Specifications

Model	OSUB10P
Part Number	OSUB10P1000
Woofer Cone	Polypropylene
Woofer Diameter	10" (254mm)
Frequency Response	35 Hz - 150 Hz
Impedance	8 ohm / 70 V
Dimensions	15.75 x 21.5 x 15.75" (400 x 543 x 400mm)

\*Not to Scale
