

Weather-X Kits

Director Collection

Enjoy the performance of your in-ceiling speakers in bathrooms, showers, patios, saunas, steam rooms, and even yachts. The Director Weather-X kits safeguard speakers from harsh outdoor elements and wet environments, preserving the performance and aesthetics over a lifetime.

BZ68WX

Weatherproof Installation

Enjoy the advanced acoustical performance of your in-ceiling speakers anytime and anywhere. The Weather-X kit is an add-on for every speaker in the Director Collection, allowing them to be installed in soffits, yachts, showers, and more.

Visually Flawless

Both the Zip-Click™ assembly and grilles of the Weather-X have been treated with a proprietary formula that safeguards against rust and discoloration of standard grilles. The appearance of the grille stays unchanged in the face of the most extreme weather conditions.

Magnetic Grille

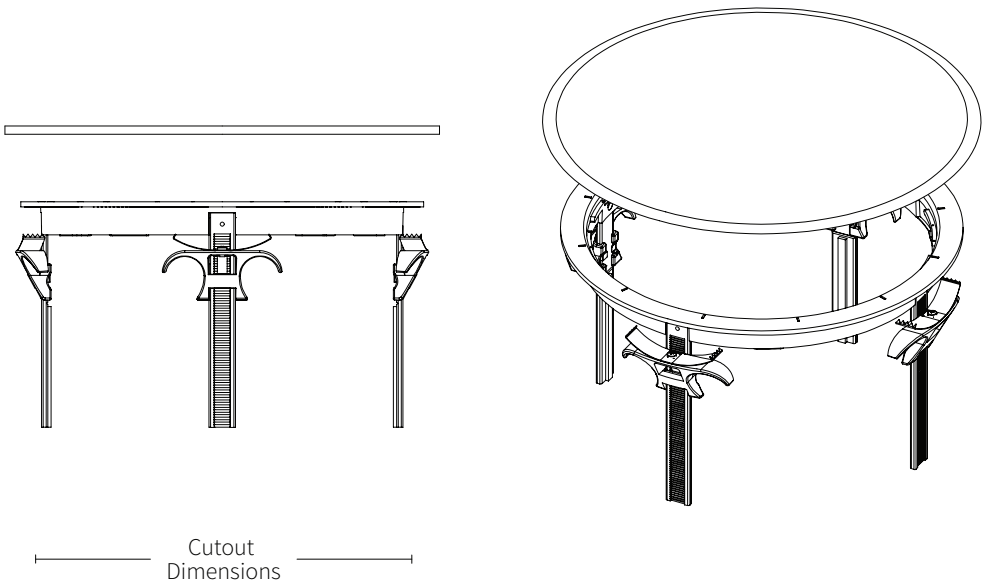

A paintable, perforated grille with a micro bezel covers the entire speaker assembly and leaves a discreet finished appearance. Its magnetic attachment makes removing or replacing the grille fast and easy.

Lifetime Warranty

Origin Acoustics warrants the speaker grille and assembly from discoloration and rust in environments with extreme heat, cold, and wetness. Each Weather-X kit has been engineered to withstand full submersion in water for over 10,000 hours without showing any signs of rust or discoloration.
