PAGT1AV includes 7x PAG/PLTK couplers

SKU: PAGT001 | PAGT1AV (or PAGT1AV includes 7 x PAG/PLTK couplers)

Description

The Patch App & Go Network Tester is the one-man Data Continuity Tester and Cable Tracer, powered by any mobile device running on android or IOS. Simply download the app to your device and testing of any Lan cable becomes a quick and easy process.

Supplied with 6 Smart Remote Plugs *(with the option of buying more)* which are individual programmed with numbers from 1 to 6. As you test the Patch App & Go will visually display a pass or fail, as well as confirming the unique ID of the smart plug currently being tested.

Data Network Tester

Patch App & Go is supplied with 6 Smart Remote Plugs *(with the option of buying more)* which are individual programmed with numbers from 1 to 6. As you test the Patch App & Go will visually display a pass or fail, as well as confirming the unique ID of the smart plug currently being tested.

The Patch App & Go Cat 6 Tester is suitable for testing Cat 5e, Cat 6, Cat 6A, unshielded and shielded network cables. As the device performs each test the results will appear as a pass or fail on your mobile device. When a fail is reported, the app will instantly display errors such as mis-wires, split pairs, shorts and open ends.

Data Cable Tracer

Patch App & Go can be used to trace unidentified or unlabelled data ports. By inserting the Smart Remote Plugs into the ports of the Patch Panel, Patch App & Go will send a trace from the Wall outlet, through the data cable to the uniquely numbered Smart Remote Plug, activating its LED and displaying the plugs ID on the app.

Saves Time & Money

Patch App & Go T1 eliminates the need and additional expense of having two men on site to carry out testing, or the time-consuming method of testing by yourself. By using as many Smart Remote Plugs available, you can insert them into the Patch Panel sockets and begin testing.
