

CM-232 SERIAL COMMUNICATION MODULE

DESCRIPTION

The CM-232 communication module provides an RS-232 interface to almost any RS-232 enabled device. It attaches to an RTI control system on one end, and a device's DB-9 serial port connector on the other end. The CM-232 is capable of one-way transmission (no receive function is supported) of user-defined character or binary strings. These character strings, as well as the baud rate, parity, and bit structure are programmed using RTI's TheaterTouch™ Designer software package.

KEY FEATURES

- *Connects to the output ports of RTI control systems*
- *Allows the RP-6 to send commands to almost any RS-232 enabled device*
- *Software-selectable baud rate up to 115.2K*
- *Industry-standard DB-9 male connector*
- *No power supply required – power is supplied by the RP-6 output ports*
- *User-definable output strings using TheaterTouch Designer software*

SPECIFICATIONS

Baud Rate	Software Selectable (Depends on attached control system)
Cable Length	12 Feet (3.7 m)
Connector	DB-9 Male
Pins Used	GND, TXD, DTR (tied high)
Dimensions	(W x H x D) 1.3" (33mm) x .5" (14mm) x 2" (51mm)
Warranty	One Year (Parts & Labor)*

**All specifications subject to change without notice.*
