

BluOS Single Zone Streamer CI S1

NAD CI S1

BluOS Streaming Module

The NAD CI S1 BluOS Single Zone Streamer is a compact, high-resolution multi-room solution designed for professional integrators who need reliable performance in minimal rack space. Part of the NAD Custom Install Modular Series, its 1U height, 1/3 width form factor and shared ChassisLink system allow up to three Modular Series units to be combined side-by-side in a single rack space, while delivering the full power of the BluOS ecosystem. Supporting over 20 streaming services, internet radio, AirPlay 2, Bluetooth, Spotify Connect, Tidal Connect, and local content, the CI S1 integrates seamlessly into distributed audio systems. Full driver support is available for leading control platforms including Control4, Crestron, URC, RTI, NICE, Lutron, and KNX.

Built for performance and installation flexibility, the CI S1 combines an audiophile-grade ESS Sabre ES9039Q2M DAC with up to 24-bit/192kHz playback and no downsampling. Power options include both Power over Ethernet (PoE) and 12 V DC input, giving installers freedom to simplify cabling or adapt to existing infrastructure. Dual stereo outputs can be configured in a Main Zone/Sub Zone mode, providing two independently volume-controlled outputs from a single stream to expand system design without added hardware. A programmable 12 V input trigger enables BluOS functions to be assigned to trigger status changes, offering a degree of automation even without a control system.

A comprehensive set of digital and analogue connections ensures the CI S1 can serve as both a dedicated streamer and a bridge between cloud-based content and local sources in a rack installation. With TOSLINK, coaxial (with Dolby decoding), and analogue RCA inputs, plus stereo RCA, optical, and subwoofer outputs, it offers comprehensive connectivity for external audio sources. Remote monitoring and management are supported via Domotz, making the CI S1 a reliable and scalable addition to any BluOS-enabled installation.

- Compact 1/3 width x 1U height rack size with ChassisLink for efficient installation
- BluOS Enabled with support for 20+ streaming services, internet radio, AirPlay 2, Spotify Connect, and Tidal Connect
- Up to 24-bit/192kHz high-resolution playback with no downsampling
- Main Zone/Sub Zone configuration with independent volume control
- Audiophile-grade ESS Sabre ES9039Q2M DAC for detailed, low-distortion audio
- Inputs: TOSLINK, digital coaxial (with Dolby decoding), analogue RCA
- Outputs: TOSLINK, 2 x stereo RCA, subwoofer out
- Programmable 12 V trigger input and 12 V trigger output
- Gigabit Ethernet and PoE or 12 V DC power input (<10 W consumption)
- Flexible rack and surface mounting options
- Robust drivers for Control4, Crestron, URC, RTI, NICE, Lutron, and KNX
- Remote monitoring via Domotz

Included Accessories

Universal 12V DC Power Adaptor

2 x Short rack ears (also used as
wall mount brackets)

2 x Long Rack ears/Blacking
plates

2 x Shoulder Bolts + 2 x Rubber
Washers (already attached for
ChassisLink)

1 x 4-PIN PHX Connector for
12v Trigger In + IR

2 x 2-Pin PHX Connectors for
12v Trigger Out and DC Power In

4x optional stick on rubber feet
